Optimize Your Supply Chain to Keep Up With the Dynamically Changing Environment

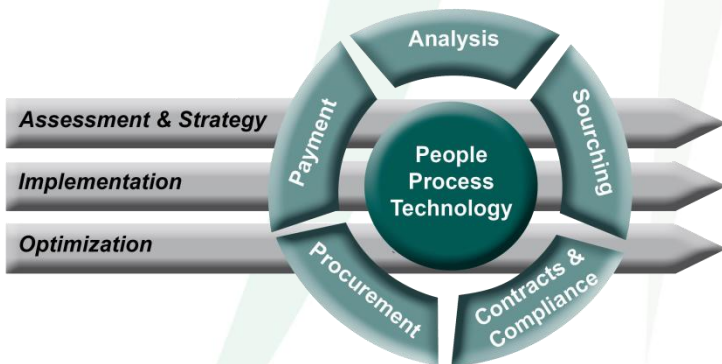

If a business wants to be on top, and stay there – it can't shy away from dynamic change and industry evolution. Success is a moving target, and without new resources and a tangible strategy to pull from, the target is easily missed. Integrity Consulting offers a variety of supply chain solutions to keep your company constantly up to speed with its changing environment. Integrity will assist your organization in tactile, strategic and operational manners. We have a strong focus on streamlining costs and improving your supply chain service quality.

WE OFFER A VARIETY OF APPROACHES - WHICH ONE IS RIGHT FOR YOU?

Integrity is keenly aware that one solution does not fit all, especially when it comes to something as individual as bringing product, manpower and supply into an organization. We have a suite of targeted solutions to specifically meet the changing needs of all of our clients, with a focus on streamlining costs and improving the quality of your supply chain services.

PROVEN METHODOLOGY WITH INNOVATIVE SOLUTIONS

Integrity employs an innovative procurement solution known as the Above Board Concept. Using our proven procurement and management methodologies, we help our clients from start to finish in the overall procurement process. We help our clients to streamline purchasing and to ensure that corporate standards, policies and procedures are met. We also implement compliance frameworks and improve purchasing efficiency across the organization. By using Integrity's proven approach, we ensure that key controls are being effectively implemented within your processes, helping to best reduce and manage procurement risk. Improved control and visibility, reduced cost and decision support information come from procurement control assessment.

Solutions that fit

AUTOMATION TO REDUCE TIME AND MONEY

Integrity has the procurement, asset management and the technical expertise to review, improve and automate many processes within an organization's back-office environment. Our deep knowledge of available tools allows for efficient implementation of these improvements. Integrity seeks to automate the entire asset management process, reducing time, streamlining processes and cutting costs.

STRATEGIC SOURCING FOR IMMEDIATE IMPACT ON BOTTOM LINE

Through our strategic sourcing methodology, we will provide tangible improvements that reflect immediately in your bottom line. We start with a thorough analysis of your company's spending and deliver sustainable process improvement and lasting savings. We employ a four step strategic sourcing methodology that starts with discovery, moves to category development, on to the RFP process and ends with negotiation and implementation. We work to identify annual, sustainable savings opportunities and then collaborate with clients to create the commodities required for RFP development.

DRIVE EFFICIENCY AND REDUCE COST

The overall objective of many organizations is to drive efficiency and reduce costs associated with the supply chain process, while maintaining solid financial and operational controls. We help our clients accomplish this objective by managing a coordinated effort across the organization. We believe that it is critical to establish a comprehensive vision to assess its impact to financial processes and policies prior to communicating and executing a strategy.

GRANTS MANAGEMENT

The grant process can be complex from start to finish. Integrity has experience managing the entire process, from identifying grant programs, to developing investment justifications and managing grant programs and disbursement.

CHOOSE INTEGRITY

The Integrity Strategic Sourcing team has years of procurement experience and provides key input for proposal templates that are specific to both customer needs and the unique requirements of the individual commodity that is being leveraged and negotiated.

Integrity was created with the vision of changing the nature of consulting by setting a new standard for commitment, trust and execution. We are built on the principle that doing the right things for our clients and our people always comes first. Independent thinking and straight talk are the foundation of our "trusted advisor" role with our clients.
