Align Your Company's Technology With Its Strategy

Effective technology is accompanied by integrated operations and maintenance. There is no question that technology should support the strategic direction of any organization and the underlying business process requirements. Integrity Consulting allows your company to build out desired functionality, and then creatively, and strategically, use technology to enable that business vision.

INTEGRITY CONSULTING OFFERS A FULL SUITE OF IT MANAGEMENT SERVICES TO HELP YOU:

- Define an actionable IT Strategy that aligns with your strategic business objectives, high-level risk posture, and compliance needs
- Assess, Select, Design and Architect the enabling technologies and supporting infrastructure
- Develop, Configure and Implement custom and packaged solutions
- Validate technology solutions deliver results that meet business requirements and comply policies and regulations

MAKING IT STRATEGY FLEXIBLE AND ACTIONABLE

IT Strategy

Defining the most appropriate technology roadmap to support your business objective is crucial, and we know that the stakes you face are high. Our solution team helps your organization define the right IT strategies to achieve a competitive advantage that lasts, ultimately building stakeholder value. It defines business capabilities to support your strategies and creates actionable plans and discrete projects to help you effectively and efficiently implement lasting change.

Information Security

Integrity Consulting will help your organization with long term strategic planning, including assistance with security policies and procedures to ensure your security posture remains current and effective. Using proven technologies and methodologies, we will help you understand your current risks and where they exist. We benchmark your organization against a number of standards and best practices to help corporations improve overall security postures.

**Solutions
that fit**

ARCHITECTING TECHNOLOGY SOLUTIONS TO ENABLE THE BUSINESS

Enterprise Architecture & Technology Selection

Enterprise Architecture defines the future structure of your business in terms of capabilities, elements and interrelationships. The complexity of integrating people, process, technology, assets and geography with strategy requires working through high level issues. Our solution team will help define how your organization will operate in the future, by assessing the current, identifying gaps and developing a plan to close them.

Our goal is to help find solutions for your business problems. Our team will help vet and recommend the appropriate technology for your enterprise by navigating the gamut of technology options and defining the best selection model for your requirements.

IMPLEMENTING LASTING CHANGE

Application Development

Integrity will help you navigate the waters of a custom application development by using:

- Proven project management techniques to manage scope
- A best practices approach to requirements management
- Industry standard software development methodologies
- Rigorous testing techniques
- Effective communication and change enablement

Systems Implementation and Integration

We will help you implement a wide range of unique tools and technologies, including:

- Customer relationship management (CRM)
- Data warehouse/business intelligence
- Resource planning (ERP)
- Portals and collaboration
- Workflow & process automation
- Compliance solutions

Application Maintenance & Support

Our sustenance services provide a complete package of support including change management, release planning, configuration management, application development, patch management and data archival.

Data Management & Analytics

Effectively choosing where to apply scarce resources and capital can have an enormous impact on business results and shareholder value. Integrity will help identify key metrics to measure and implement business intelligence solutions to manage, analyze and report against those metrics.

VALIDATING THE DELIVERY OF BUSINESS VALUE AND COMPLIANCE

Independent Verification & Validation (IV&V)

IV&V ensures that an unbiased third party completes the process of checking that a product, service or system meets all specifications and fulfills its intended purpose. Integrity's IV&V team is your company's business assurance.

Certification & Accreditation

Using our formal methodology and web-based compliance toolset, we help our clients ensure that systems and applications adhere to the formal and established security requirements as required by the Federal Information Security Management Act (FISMA) of 2002.

CHOOSE INTEGRITY

Integrity was created with the vision of changing the nature of consulting by setting a new standard for commitment, trust and execution. We are built on the principle that doing the right things for our clients and our people always comes first. Independent thinking and straight talk are the foundation of our "trusted advisor" role with our clients.
